concrete

INDEX Volume 1 1967

Figures in **bold** represent the issue number, which is followed by the relevant page number

Accidents in the construction industry **4**:124
Admixtures **10**:362
Airport, Newcastle upon Tyne, New **7**:238
American look-back **7**:236
Analysis of rectangular tanks **5**:169
of single-storey shear-wall structures **6**:191
of unset concrete, Rapid **9**:310
Architecture in concrete **1**:37
of bridges **2**:65

Authors

Abeles, P. W.: Design of reinforced and prestressed concrete beams **3**:83
Akroyd, T. N. W.: Winter concreting: specification and quality control **10**:339
Baines, G. G.: American look-back **7**:236

Short, A.: The CEB recommendations and the structural use of lightweight concrete **8**:281
Smith, J. R.: Economics of winter concreting **10**:349
Soare, M.: Cooling towers with constructional imperfections **11**:369
Stein, J., *et al.*: Techniques and formwork for continuous vertical construction **1**:29
Tagg, J. V.: Concrete production and protection in winter **10**:342
Taylor, A.: Flat-slab design **2**:67, **2**:75
Teychenné, D. C.: Structural concrete made with lightweight aggregates **4**:111
Thomas, F. G.: Structural safety **1**:9
Turner, F. H., *et al.*: Design of end-blocks for post-tensioned cables **12**:431
Walker, W. P., *et al.*: Foundations for reciprocating machines **10**:327
Weston, G.: The British Standards Institution **7**:227
Wilson, L. H.: Elevated structures in towns **8**:266

Autoclaved aerated concrete **4**:141, **8**:285
(see also lightweight concrete)
Awards **8**:280

Beams, Design of reinforced and prestressed concrete **3**:83
Shrinkage and deflection of composite prestressed concrete **5**:157
subjected to biaxial bending, Rectangular **12**:407
subjected to combined bending and torsion, Design of rectangular **7**:241
Torque-twist relationship for rectangular **11**:382
with flexible connectors: A survey of research, Steel-concrete composite **12**:425
Bending dimensions and scheduling of reinforcing bars **8**:277
Biaxial bending, Rectangular beams subjected to **12**:407

Bridges
Angostura suspension bridge **2**:60
Architecture of bridges **2**:65
Canada, Bridges in **5**:155
Cascade Orchards Bridge **3**:103
Columbia River Bridge, Kinnaird, Canada **5**:149
Concrete construction in new major bridges **2**:51
Design standards for prestressed concrete bridges **12**:413
Germany, Long-span prestressed concrete bridge in **3**:103
Gothenburg suspension bridge **2**:60
Greyfriars Bridge, Hereford **3**:103
Grosvenor Railway Bridge, Reconstruction of **3**:87
India, Long bridges in **2**:59
Manchester, Prestressed concrete footbridge at **3**:102
Oösterschelde Bridge **3**:97
Oxford Southern By-pass, Bridges on **3**:99
Precast segmental construction, Design of bridges of **12**:415
Prestressed concrete bridge structures **12**:413
Redbridge fly-over, Southampton **3**:101
River Thames, Another new bridge across **3**:100
Severn Bridge **2**:51
Shear connectors in steel-concrete composite beams for bridges **9**:291, **10**:351
Some recent concrete bridges **3**:97
Stockbury Valley Viaduct **12**:417
Tagus Bridge, Lisbon **2**:53
Tay Road Bridge **2**:57

British engineers honoured in USA **1**:42
Standards Institution **7**:227
Building Exhibition 1967 **7**:252, **10**:363

Canada, Concrete construction in **5**:149, **5**:156
Cathedral of Christ the King, Liverpool, Metropolitan **6**:181, **7**:223
CEB recommendations and the structural use of lightweight concrete **8**:281
Cement and Concrete Association: report for the year 1965 **2**:76
Cement-gun work (shotcrete) **7**:240, **8**:279, **10**:362
Characteristic strength of steel for reinforcing and prestressing concrete **8**:273
Chimney 850 ft high, Concrete **7**:244
Chimneys, 1,000-ft **10**:360
Reinforced concrete **3**:94
and shafts, Effects of wind on large-diameter **9**:303
Composite beams for bridges, Shear connectors for steel-concrete **9**:291, **10**:351
Computers, Reduction of design office drudgery by use of **8**:267
Concrete: a medium of architectural design **1**:19
and the future **1**:42
construction, New ACI standards for **4**:131

The Concrete Society
Banquet, Inaugural **1**:43
Building for movement in London **8**:287
Committees 1966–67, Working **1**:46, **3**:106
1967–68 **10**:365
Council and Honorary members dinner **9**:321
Council 1966–67, Officers and **1**:44
1967–68 **7**:251
Exposure of concrete, Long-term **12**:438
Failures in civil engineering works **8**:288
Formwork, Design of **5**:174
in the Netherlands **5**:175
practice **5**:175
Forthcoming events **1**:48, **2**:78, **3**:106, **4**:145, **5**:178, **6**:214, **7**:252, **8**:288, **9**:324, **10**:350, **11**:404, **12**:440
Honorary members dinner, Council and **9**:321
The new **9**:323
International Congress on Lightweight Concrete 1968 **12**:439
Luncheon meeting: Mr John Davies on 'Labour relations' **4**:143
Moulds for precasting **12**:440
Notes and news **1**:43, **2**:77, **3**:106, **4**:143, **5**:176, **6**:213, **7**:216, **7**:247, **8**:287, **9**:321, **10**:363, **11**:402, **12**:437
Officers and Council 1966–67 **1**:44
Progress and development of the Society: President's letter to members **10**:363
Reinforcement consumption **12**:439
Sir Frederick Snow, Presentation to **9**:323
Tall buildings, Structural form in **6**:213

Concrete Technology Certificate **1**:8
Construction field, Concrete in the **1**:23
Continuous vertical construction, Techniques and formwork for **1**:29
Control, Some trends in concrete specification and **2**:71
Cooling towers with constructional imperfections **11**:369
Courses in concrete, Post-graduate **7**:245, **10**:346
Crack control by various types of reinforcement **8**:276

Deflection of composite prestressed concrete beams, Shrinkage and **5**:157
Detailing, Reinforcement and **1**:26
Development of concrete, Review of **1**:35
Durability of steel embedded in lightweight concrete **4**:125

Editorial notes
Bridging the training gap 6:179
Composite construction 9:289
'Concrete' and The Concrete Society 1:1
Concrete codes 2:49
Concrete roads in the nation's economy 5:147
Engineers and training 12:405
Formwork construction with plywood 11:367
Lightweight concrete 4:110
Metric system: the ACI view 5:148
systems 4:109
Ready-mixed concrete 7:215
Reinforcement 8:253
Structural failures 3:81
Winter concreting 10:325

Elevated road structures 6:197
structures in towns 8:266
End-blocks for post-tensioned cables, Design of 12:431
EXPO '67, Concrete structures at 8:259

Film, Yorkshire–Lancashire motorway 3:103
Flat-slab design: background to Code of Practice recommendations 2:67, 2:75
Flat slabs, Design of 10:361
Forms in sewage works construction, Steel 11:391
Formwork, Plywood for 11:395
symposium on plastics in 11:399
Foundations for reciprocating machines 10:327
Frame instability 2:61
'From 1910 to EXPO '67' 9:317

Habitat '67 5:167, 8:262
High-alumina cement 9:320

Industrialized building, A Canadian system 5:167

Joint sealant, New cold-applied 3:105

Lambot's boats 11:380
Leaders in teaching, research and design, Future 1:15
Lightweight-aggregate concrete structures in the UK 4:123
Symposium on 6:207
Testing and design methods 9:318
Lightweight aggregates, Structural concrete made with 4:111
Lightweight concrete, Air entrained 11:401
CEB recommendations and structural use of 8:281
Durability of steel embedded in 4:125
in house construction 4:132
in the USA, Prestressed 4:140
Manufacture of 4:133
reported research work in UK 11:403
(see also autoclaved aerated concrete)
Liverpool, Concrete in the redevelopment of 7:229

Metropolitan Cathedral of Christ the King 6:181, 7:223

Messages to 'Concrete' and the Concrete Society 1:3, 2:77
Metric, Symbol for change to 9:320
Montreal, Concrete construction in 8:255

Newspaper building at Portsmouth 3:89
Noise, Isolation of vibration and 12:420

Paving practice, Continental 6:201
Pipes, British Standard for concrete 4:134
Plastics in formwork, Symposium on 11:399
Plywood for formwork 11:395
Pressure vessels, Conference on prestressed concrete 12:434
Prestressed concrete beams, Design of reinforced and 3:83

Publications
Basic Theory of Structures by J. S. C. Browne 10:338
Basic Values of Single Span Beams by G. Baum 9:319
Cement Grouts and the Grouting of Post-tensioned Prestressed Concrete by I. Soroka and J. D. Geddes 5:168
Charneiras Plasticas em Lajes de Edificios by T. van Langendonck 5:168
Code of Practice for Reinforced Concrete GBV 1962–Netherlands 11:394
Computer Method for the Analysis of Restrained Columns by W. B. Cranston 11:394
Concrete Construction by C. E. Reynolds 12:424
Concrete Floor Finishes 1:34
Considerations on the Cross-sectional Design of Prestressed Concrete Bridges with Reference to Bridges Built in 1960 by H. Wittfoht 11:394
Construction Regulations Handbook 2:64
Determining the Relation between Moment, Axial Load and Curvature of Structural Members by W. B. Cranston 1:34
Effect of Wind on Creep and Drying Shrinkage of Hardened Cement Mortar and Concrete by T. C. Hansen 5:168
Elementare Schalenstatik by A. Pfluger 6:196
Engineering at Cambridge University 1783–1965 by T. J. N. Hilken 6:196
Engineering Mechanics by B. N. Thadani 2:70
Examination of the Stability of Expansion Joint Assemblies under Loads Applied by Concrete Road-making Machines by J. Weaver 2:64
Fire Risks on Building Sites 10:338
Flexural Mechanics of Reinforced Concrete 2:70
Glossary of Formwork Terms 2:64
Hot Weather Concreting 2:64
I.C.E.S. System Design by D. Roos 12:424
Investigations into the Effect of Freezing on a Typical Road Surface by J. C. Jacobs and G. West 10:338
Kempe's Engineers' Year Book 1967 10:338
Konstruktionslehre des Stahlbetons. Vol. I: Grundlagen und Bauelemente by G. Franz 3:88
Leichtbetonbaukonstruktionen by G. Rudnai 6:196
Matrices for Structural Analysis by S. J. McMinn 3:88
Model Investigation of Skew Slabs on Elastically-yielding Point Supports by A. Mehmel and H. Weise 2:64
Multi-storey Frames by F. Takabeya 2:70
Performance of a Delmag SV2 8-cwt Vibrating-plate Compactor in the Compaction of Soil by A. F. Toombs 5:155
Preliminary Investigation to Determine the Resistance of Cement-stabilized Materials to Repeated Loading by I. F. Symons 10:338
Properties of Concrete that Affect the Selection of Structural Systems 9:319
Puentes de Hormigon Armado Pretensado Vol. II by C. F. Casado 2:70
Ready-mixed Concrete in the USA by B. W. Shacklock 11:394
Reinforced Concrete Design by G. P. Manning 1:22
Report on Concrete Practice. Part I: Materials and Workmanship 11:394
Restrained Long Column as Part of a Rectangular Frame. Parts I and II by J. E. Breen and P. M. Ferguson 10:338
Road Research Laboratory Publications 2:64
Road Temperatures in the Tropics by P. K. Roberts and K. Russam 5:155
Safety for Industry by F. L. Creber 10:338
Settlement Behind Bridge Abutments by G. Margason and J. E. Cross 5:155
Silos and Bunker in Stahlbeton by W. Fischer 3:88
Soil Mechanics by M. J. Smith 6:196
Some Problems in the Theory of Creep in Concrete Structures by N. K. Arutyunyan 9:319
Structural Lightweight-aggregate Concrete by J. K. Nesbit 11:394
Supervisors' Guide to the Construction Regulations 2:64
Tall Buildings Ed. by A. Coull and B. Stafford 12:424
Temperature Change Effect on Behaviour of Cement Paste, Mortar and Concrete Under Load by T. C. Hansen and L. Eriksson 5:168
Tests on a 1/12 Scale Model of the Mancunian Way by G. Somerville, F. Roll and J. A. D. Caldwell 1:34
Theory of Beams: The Application of Laplace Transformation Method to Engineering Problems by T. Iwinski 9:319
Theory of Structures by M. J. Smith 6:196
Thin Walled Beams by K. Zbirohowski-Koscia 10:338
Third Symposium on Earthquake Engineering, Roorkee, India, November 1966 5:168
Torsion by C. F. Kollbrunner and K. Basler 2:70

Ultrasound in the Production and Inspection of Concrete.
Part I: Production Applications by Y. E. Kornilovich and V. I. Belokhvostikova **3**:88
Part II: Inspection in Hydraulic Construction by A. K. Tret'yakov and A. M. Filonidov **3**:88
Ultrasound. Physical Chemical and Biological Effects by I. E. El'piner **3**:88
Use of Stabilized Pulverized Fuel Ash in Road Construction by P. T. Sherwood and M. D. Ryley **5**:155

Ramps, Reinforced concrete **9**:305
Ready-mixed concrete **4**:142, **5**:166
Quality control of **7**:217
Reduction of design office drudgery by the use of computers **8**:267
Reinforced and prestressed concrete beams, Design of **3**:83
Reinforcement, and detailing **1**:26
Recent lecture on **8**:278
Revised British Standards for **4**:134, **6**:205
Reinforcing bars Bending dimensions and scheduling of **8**:277
Research on concrete **1**:5
RIBA architecture awards 1967 **8**:271
Road construction, Efficiency in **7**:237

Safety in construction **7**:235
Structural **1**:9
San Francisco, Elevated railway track **3**:103
Scheduling of reinforcing bars, Bending dimensions and **8**:277
Shear connectors: A survey of research on steel-concrete composite beams with flexible **12**:425
in steel-concrete composite beams for bridges **9**:291, **10**:351
Small-scale push-out tests on welded stud **9**:311
Shear-wall structures, Analysis of single-storey **6**:191
Shells, Formulae for transverse moments and thrusts in long inner cylindrical **12**:435
Shotcrete (Cement-gun work) **7**:240 **8**:279 **10**:362
Shrinkage and deflection of composite prestressed concrete beams **5**:157
Slabs, Stresses in skewed **4**:135
Slide for metric-imperial equivalents, Conversion **11**:379
Slip-form paving: recent developments **11**:387
Slip-forms (see Continuous vertical construction)
Specification and control, Some trends in concrete **2**:71
Steel embedded in lightweight concrete, durability of **4**:125
for reinforcing and prestressing concrete, Characteristic strength of **8**:273
Stresses in skewed slabs **4**:135
Structural concrete made with lightweight aggregates **4**:111
Studies and industrial training, Vocational **1**:17
Symposium on plastics in formwork **11**:399

Tanks, Analysis of rectangular **5**:169
Technology, Development of concrete **1**:13
Terrazzo tiles, British Standard for **9**:320
Tests on welded stud shear connectors, Small-scale push-out **9**:311
Torque-twist relationship for rectangular beams **11**:383
Torsion, Design of rectangular beams subjected to combined bending and **7**:241
Towers, Tall **10**:359
Training courses **3**:104
Vocational studies and industrial **1**:17

Unset concrete, Rapid analysis of **9**:310
Urban architecture: RIBA presidential address **2**:69

Vibration and noise, Isolation of **12**:420

Welding reinforcement **8**:276
Wind on large-diameter chimneys and shafts, Effects of **9**:303
Winter, Concrete production and protection in **10**:342
concreting: specification and quality control **10**:339
A miscellany **10**:347
